About Me

Results-driven IT Project Manager with 6+ years of experience delivering software and digital solutions for international clients across Germany, UK, USA, and UAE. Proven expertise in Agile/Scrum execution, cross-functional team leadership, stakeholder communication, and risk management. Known for turning complex requirements into structured delivery plans and consistently meeting timelines under pressure.

WORK EXPERIENCE

IT Project Manager / Product Manager – DoceHero (Remote, Contract)
May 2021 – Present

- Led end-to-end delivery of 10+ web and SaaS projects
- Led 10+ web and SaaS projects with 95% on-time delivery and zero critical post-launch failures.
- Coordinated cross-functional teams
- Managed cross-functional teams of 8–15 members across QA, Dev, and Design.
- Reported and tracked 500+ defects
- Identified and tracked 500+ defects, reducing production bugs by over 40%.

TechX Solutions – Islamabad | Jan 2019 – Apr 2021

SQA Engineer → Associate Project Lead

- Transitioned from QA role into project coordination and delivery leadership
- Managed sprint coordination, task delegation, and progress tracking
- Reported and tracked 500+ defects, driving measurable quality improvements
- Supported roadmap discussions and release planning with senior stakeholders
- Strengthened client trust through clear reporting and communication

Early Career (Intern → Team Lead)
Virtual House | Mindbridge | Codersbrain | Lahore | 2016 – 2019

- SQA Intern at Virtual House: Assisted in manual and automated testing of web applications, created test cases, performed regression testing, and supported senior QA team members in ensuring product quality.
- Frontend Developer at Mindbridge: Developed responsive UI components using HTML, CSS, and JavaScript; worked closely with backend developers to integrate APIs and optimized user experience through modern frontend techniques.
- SQA Team Lead at Codersbrain: Managed a QA team of 5+ engineers, led testing strategies and QA documentation, ensured smooth collaboration between QA and development teams, and handled full test life cycle for multiple software releases.

Key Achievements

- Delivered 10+ international projects with consistent on-time delivery
- Reduced QA rework through integrated SDLC governance
- Promoted from QA Engineer to Associate Project Lead within 18 months
- Managed multi-timezone teams across Pakistan, Europe, and Middle East
